AIGRO SMART POULTRY

Reliable, Easy To Use, Empowered By AI

- ✓ Smart Climate Control and Production System specifically designed to handle tropical weather
- ✓ Powered by Artificial Intelligence and Big Data for continuous optimization of barn climate condition and operation
- ✓ Continuous monitoring and real-time alarm to address critical issues and avoid production hazards
- ✓ Extensive reporting provides crucial insight into production performance

The smart system that continuously optimizes your farm

Our proprietary Artificial Intelligence modeling continuously analyze and optimize your farm house based on extensive data collected throughout our deployments in Malaysia.

Aigro’s intuitive dashboard empowers smart farmers with full overview and control of farm production, making sure that you stay on track for success.

Cloud enabled nature of Aigro system allows remote access to your farm house from anywhere in the world, and at the same time make 24x7 real time monitoring a reality.

Affordable and Future Ready

Affordable monthly subscription, no heavy capital investment on equipment that quickly becomes obsolete.

Upgrades from our continuous R&D; you can harness new technologies that enhances your farm house productivity.

Dependable Service and Support

You can count on our routine (for subscribers) or on-call support for worry-free operation.

Subscribers also enjoy 24x7 monitoring service of your farm houses by our Operation Monitoring Center.

AIGRO SMART POULTRY

Reliable, Easy To Use, Empowered By AI

What can AIGRO do?

- Temperature and Humidity Control and Monitoring
- Cooling and Heating Control
- Ventilation and Air Inlet Control
- Feed Control and Monitoring
- Water Consumption Monitoring
- Lighting Scheduling and Control
- Chicken Weight Monitoring
- Optional Ammonia and Carbon Dioxide Monitoring and Exhaust Control
- Production Data Monitoring
- Growth and FCR Reporting
- Alerts and Alarms
- Emergency Ventilation Backup
- Daily / Batch Summary
- Data Analytic
- Regulatory / Compliance Reporting
- 24x7 Monitoring

AIGRO Advantage

Subscription Model	•Minimal Barrier of Entry, No Huge Capital Expenditure
Smart Controller	•Collect Operational Data, Big Data Analytics, Smart and Informed Decision Making
First Made In Malaysia	•First Ever Real Time CONTROLand MONITORING Smart System
Continuous Upgrade	•Make Sure Investment Does Not Become Obsolete, Can Endure Climate / Environment Change
24x7 Monitoring	•Peace In Mind, A Helpful Hand Is Always In Reach
Tropical Climate	•Designed To Handle Malaysia’s (and tropical country) Tropical Weather
Early Warning	•Avoid Production Hazard, Fail-Safe Mechanism
